Have we shared this with Michael Cox and the folks in OCE?

Thanks Tom.

I do know Jay Lazarus well. He is considered quite competent in the hydrogeology industry and has worked on ground water contamination litigation cases for many years. The fact that he's been brought on board reaffirms my belief that this will be tied up in litigation for a long time. As you can see, these reports have been shared widely throughout the dairy industry. I doubt you will get much cooperation from them now.

FYI - I sent these to the Yakima team, but thought you might also be interested. Thought you might be familiar with Glorieta Geoscience since they are from New Mexico

I imagine you've seen this, but in case you weren't included, here is the dairy fed's critique of the Yakima study.

Subject: Background review on EPA report

Fyi all,

Here is a review of the EPA Yakima report from Dr. Muktar at Texas A & M as well as a longer review from Glorietta Geosciences in New Mexico. We have more coming, all are coming to the same conclusion as these.
